A single-failure model is the same as a compound-success model: if a single component failure causes the system to fail, then every component must succeed for the system to succeed. A compound failure model is the same as a single-success model: if every component must fail to cause the system to fail, then Models of Care | Heart Online Models of care and eligibility. There is strong evidence supporting cardiac rehabilitation and heart failure (HF) disease management programs which aim to decrease morbidity and premature death, and to improve quality of life. As many patients with a cardiac condition often have other co-morbidities and complex disease, programs provide a multidisciplinary and comprehensive disease management Computational fatigue crack growth analysis in layered ...
